

## Sources Document - Group 11

**Module/Code:**

We used a wordpress theme as our client side page. The code is mostly in "SFWeb/public/index.html" in the Code folder. It has been highly modified to convert it from static page to a dynamic page with Vue as it's renderer.

**Code:**

Some of our code might be similar to (but not copied from) TheNetNinja's youtube tutorial on Vue. We used his tutorial on Youtube and his Udemy course to learn Vue and used some industry practises that he used.

**Code:**

The Regular Expressions (RegEx) for phone and email validation were taken from the regexlib (RegExLib)
